

Movie Rating Prediction

Objective

Predict movie ratings using machine learning based on a Kaggle movie dataset.

Dataset

Kaggle Movie Rating dataset.

Technologies Used

Python, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn.

Workflow

1. Load dataset.
2. Clean missing values and duplicates.
3. Perform EDA.
4. Encode categorical variables.
5. Split train/test data.
6. Train regression model.
7. Evaluate using MAE, MSE, RMSE and R^2 score.

Outcome

Built a movie rating prediction model and analyzed important features.
